

We carry **Canare . Ghielmetti . Conducfil**  
**Fischer . Neutrik** for your needs

## OUR PRODUCTS

- Audio Connector
- Video Connector
- Triax Connector
- Audio Cable
- Video Cable
- Patch Panel

### Broadcasting

The Broadcast professionals and producers demand high-performance, reliable equipment. Our Connectors delivers consistently, offering leading edge technology, consulting, installation, and training. The 1051 HD Triax connectors link HD video cameras and related equipment dependably. Plug-and-play solutions include fiber optic signal and power connectors, plus options for connecting the camera control unit (CCU) to cameras, equipping outside broadcasting (OB) vans, and connecting fiber media converters.

### Security

Civil security applications, such as surveillance and communication equipment, unmanned vehicles, rugged computers or training simulators, require dependable and cost-effective solutions. Designed for use in the field, our Connectors' products are lightweight, rugged, and reliable, and answer the call for secure high-speed data with 360° EMI shielding to prevent electromagnetic interference. Fiber optic connector options for closed circuit television (CCTV) are available.

### Oil & Gas

High-performance, high-reliability solutions are a must in the oil and gas industry to allow the efficient extraction of natural resources, where dependable operation can help prevent costly downtime or accidents. Connectors are proven to perform with seismic evaluation and drilling instruments, geophysical devices and infrastructure maintenance. Our rugged, corrosion proof stainless steel connectors withstand the toughest conditions.

### Industrial

Our Connectors provide push-pull connectors for a wide variety of industrial applications, including machine control systems, robotic technology, sensors and inspection. Our connectors feature a rugged design that's tough enough to perform in harsh environments, minimizing vibration, withstanding temperature extremes and resisting moisture. Hermetically sealed connectors are effective for use in vacuum or pressurized environments. Upgrade communications and vision systems to fiber optic for speed and additional data capacity with sealed, field-cleanable connector and cable solutions.

### QUESTIONS

For specific technical questions, contact one of our specialized sales staff. Our sales staff are highly trained to deliver products for your specific needs. Feel free to contact us at any time.
